# Fisheries Certificate Schedule

Gulf of Alaska Pacific Cod Demersal Trawl Fishery

**Client/Certificate Holders:**

Alaska Fisheries Development Foundation

**Management System:** Pacific cod are managed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act, MSA), with management recommendations from the North Pacific Fisheries Management Council (NPFMC) and implementation through the National Marine Fisheries Service (NMFS). Under the MSA, the NMFS must manage fisheries to maintain optimum yield (OY) by rebuilding overfished fisheries and preventing overfishing. Alaska manages a small portion of the Pacific cod fishery in state waters.

**Chain of Custody:** Most Gulf of Alaska Pacific cod are landed on shore unprocessed, with a portion being processed and frozen at-sea as headed and gutted, frozen fillet blocks, and individually frozen fillets. Chain of custody for unprocessed on-shore landings starts upon delivery to a processing facility. Chain of custody for at-sea processors starts on board at delivery to the factory.
