RE: Letter of Support for S-K Grant titled, Alaska Mariculture Initiative

Dear Mr. Carey,

I am writing to express my support for the Saltonstall Kennedy grant proposal from the Alaska Fisheries Development Foundation (AFDF) titled, Alaska Mariculture. The Alaska Fisheries Development Foundation (AFDF) is spearheading the Alaska Mariculture Initiative which will complete the following objectives: broaden the vision and constituency of the mariculture industry from shellfish farming to also include restoration and wild fishery enhancement, coordinate efforts to develop the mariculture industry, convene a strategic planning conference in Alaska, develop a strategic plan, and gain a commitment by all participating agencies and stakeholders regarding implementation of the plan.

The mariculture industry has tremendous potential to provide new jobs in Alaska’s coastal communities for farmers, fishermen, and those supporting the industry with research, seed supply, and infrastructure. This is the constituency that I represent in the Alaska State Legislature. Increased mariculture production is not only economically beneficial to the communities in my district, but also ecologically beneficial to the marine habitat. I support the Alaska Mariculture Initiative as a coordinated strategic planning effort with a sound methodology, clear objectives and a reasonable expectation that it will facilitate expansion of the mariculture industry, leading to increased jobs, increased seafood sales, economic growth, and a resilient industry.

Sincerely,

Representative Peggy Wilson
House District 33
Alaska State Legislature
